

# Comfort at Your Fingertips

## « DEBLEED

### Some of Debleed's benefits are:

- Helps stop minor bleeding fast
- Naturally derived oxidized cellulose
- Ideal for persistent or recurring bleeding
- Easy to use

Debleed can help stop superficial bleeding, helps relieve pain and can prevent infection. It disinfects the wound, protects the skin around the cut or scrape and promotes natural healing of the damaged tissues.

It can rapidly absorb the blood from minor scrapes and cuts to form a soft layer over the area that helps stop bleeding fast.

This protective coat called Infecta-Shield™, which protects the wound like a bandage. Additional natural ingredients in the preparation help blood retention and can provide significant skin relief and can prevent infections from entering the cut. Debleed also promotes the formation of a scab that help stop bleeding naturally.

Children love Debleed because there is no sting like iodine or other disinfectants. No more tears, just a quick spray before putting on the band-aid. Debleed is completely natural, nontoxic, hypoallergenic.

Some of the active Ingredients include Calcium/Sodium Salt of Oxidised Cellulose .

### Debleed provides relief from:

Stops bleeding | Prevents infections & Scarring | No need for bandage | Doesn't sting (children love it!) | All Natural and "green"

Keep Debleed Relief Spray handy in your car, purse or even in your hand luggage. Its small, convenient size makes it ideal for travelling by air.

### Application:

Shake well before use. Apply liberally to the affected area.

### Debleed contains

E406, E415, Collagen, Zinc Oxide, Magnesium, Calcium, Urea.

**UP TO 30 USES**
